AUGUST IS NATIONAL WATER QUALITY MONTH

Did you know?

It is estimated that potentially only 40% of bottomland hardwood forests still remain from 200 years ago. This loss can largely be attributed to conversion of forests to cropland and urban areas.

The bays of the Barataria Estuary played a significant role in early American history. Jean Lafitte, the famous privateer and unlikely hero of the War of 1812, is said to have used Barataria Bay and the labyrinth of marshes south of New Orleans as a base of operations during the early 19th century.
